India for the World

VaccinesNation

India for the World

COVID 19 has been impacting the Global economy for more than a year. Vaccines Researchers from the private and public sectors have responded admirably by producing several Vaccines in less than a year. The first inoculations began in UK on 8th December 2020 and several billion doses are being manufactured. Many more Vaccines are in the pipeline and will be released in 2021 and later.

Production is one part of the equation, the storage, transportation and distribution poses challenges since Vaccines generally require a cold chain to maintain their efficacy. For a few Vaccines the temperatures required are as low as -80 to -60 Degrees Celsius. Challenges whatever they may be, will be overcome sooner than later.

India with its established history of producing good quality Vaccines at scale and at affordable prices is in the fore front for Vaccines against Corona. VaccinesNation will provide a snapshot of the major Indian Vaccines manufactures as well as stakeholders involved in the production and delivery of the Vaccines as well as the actual Vaccination. The publication will provide a ready reference for Companies, Countries and Organizations that may like to outsource manufacturing of their Vaccines to Indian companies or source the ones being already produced here.

Participants :

- Vaccines Companies
- Suppliers
- Logistics & Cold Chain - Refrigeration
- Syringe Manufacturers
- Other Disposables
- Equipment & Machinery
- Testing Kit Developers
- Transportation
- PPE
- Research Organizations (Company, State, National & International)
- Funding Agencies
